FUNDING AND INSURANCE OPTIONS

PRIVATE INSURANCE: PPO plans are accepted at most private rehab facilities in most states. HMO plans in NJ are usually only accepted within the state.

MEDICARE: For those below 18 and above 64 Medicare can be used for rehabilitation in state.

MEDICAID: Rarely accepted for drug/alcohol rehab alone. If “co-occurring” mental illness, there are a few facilities that will accept Medicaid IF the mental health problem is primary.

FUNDING: County funding is sometimes available for its residents. Atlantic residents in need of these services should call 645-5932 and Cape May should call 465-4100 for referral and possible financial assistance.

SCHOLARSHIPS: Many facilities will give full or partial scholarships to those in need. Each facility decides its own policy. More out of state than in-state rehabs have scholarships available. To get one you must call each rehab individually and ask.

NO COST: No cost rehabs are usually “faith-based,” meaning that the stay is covered by a church or faith-based community. It is not a requirement to be a member of the affiliated church, but the recovery program will follow the beliefs and practices of the sponsoring community.

“ADDICTIONARY”

The language used in addiction can be baffling. Here is a list of frequently used terms.

DETOX or detoxification is a medically supervised process of weaning the person off substance(s). Medical professionals prescribe medications and monitor the patient to ensure that they remain safe. Recommended for all addictive substances, but medically necessary for alcohol and benzodiazepines, as withdrawal from these substances can be fatal.

INPATIENT REHABILITATION or REHAB Stays in a medically supervised facility range from a few days to several months depending on facility and insurance.

PHP-Partial Hospitalization Program Recovering person lives at home or in a sober living facility, attends a program at the facility on average 5 weekdays, for 5+ hours each day.

IOP- Intensive Outpatient Program Recovering person resides at home and attends a program an average 3 days/nights a week for 3-4 hour sessions. Provides group and individual therapy.

OP- Outpatient Program- Usually held once/twice a week. Individual counseling with some group work. Similar to traditional therapy.

Co- occurring – Commonly used phrase when both addiction and mental health issues are present in an individual.

SELF-HELP/SUPPORT GROUPS

These groups are comprised of people with “learned experience” that share their experience, strength, and hope. There are many types of support groups, including many for family members of the addicted person.

12STEP GROUPS A support group that uses the recovery model originated by Alcoholics Anonymous. There are many 12-step recovery groups: AA (Alcoholics), NA (Narcotics), Alanon (for family members), Alateen (for teen family members).
